

Brothers Steve and Kelly McCafferty, director and manager at McCafferty Metal Cartage, made the decision to implement EROAD in the McCafferty fleet in September 2011. Kelly says, “Things have been different since then – in a good way! We’re based in Gisborne but our guys are often located 30 minutes out of town in the forest – as most of our work is for a local forestry firm.

“With EROAD’s real-time tracking I can see where the guys are located and whether it’s a good time to call to make arrangements for their next job. The convenience of buying RUC and managing off-road claims, WOF, COF and rego using AutoRUC and the online service module has saved a great deal of time – and money! Needless to say, since then we have seen significant savings from operational efficiencies.”
