

EROAD ★ RUC Star

Multi-Messaging

The less time a driver has to spend on the phone, the safer his driving and the more he can get done. We've thoroughly tested EROAD's free, tablet-based EZmessage system and it's been great for letting a driver know where and when his next job is and keeping a full record of all instructions and acknowledgements.

It's cost-effective and easy to use and we're now looking forward to rolling EZmessage out across our whole fleet.
