

# EROAD RUC Star

*All Clear*

We've got two businesses and three workshops and we can see what's happening across all of them, on one screen, thanks to EROAD.

It makes servicing that many vehicles much simpler and using an automated system rather than manual we know we're on track, and there's no risk of human error.

It's also simplified RUC. We no longer run out or get tickets. It's reduced admin time, is one less thing for our drivers to worry about and the total amount of cash outlay is drastically lower, with each vehicle sitting on 2000km rather than 5000-10,000.
