EROAD STAR

University of Canterbury

Departments used to assign roughly \$6K per month to vehicle cost allocation. Now it's around \$2500 per month.

EROAD has also had a huge impact on fuel costs. In the first month of using EROAD we received 7000 over-speed alerts. We now see fewer than 150 a week, and only four or five of these are for sustained periods of time. As a result, I've seen my fuel cost drop by up to \$3,000 per month, with increased utilisation and kilometres travelled by the fleet.
