

BUSINESS EXCELLENCE WITH EROAD

We asked our customers how the EROAD solution had helped transform their businesses. This was Redmond Heavy Hauling's response.

Redmond Heavy Hauling takes a load off with EROAD

When we were approached about the pilot program for a new and innovative solution to shape the future of our company there was no other thought than, "Hey let's check this out."

The truth of the matter is we said, "Yes we need to give this a shot and see how it works."

And now I could not imagine trying to accomplish our day to day duties without EROAD. We now have the ability to give real-time updates to our clients, our maintenance needs are tracked, and weight-mile taxes are done at the push of a button.

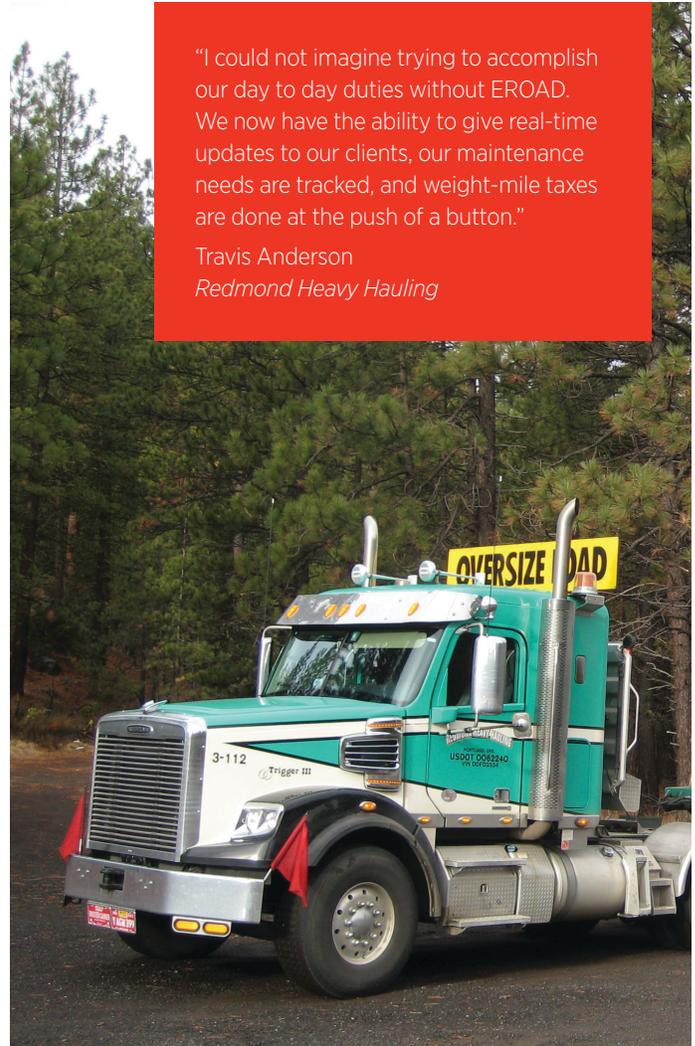

Who's driving too fast? Who's idling their truck too long? All these questions and concerns are easily addressed. Drivers can be sent messages via the Ehubo cab-mounted unit. And believe it or not, sometimes these guys lose their way and need help finding the destination. With EROAD we can give them spot-on directions to get them where they are going.

While attending industry-sponsored events or hearing of other companies that have a fleet of vehicles, you can best believe I make sure by the time we part ways that they will have heard about EROAD and the tremendous benefit it can offer them.

At our company we have been an EROAD supporter since day one. Just recently we were able to finally go paperless and allow our drivers to stop filling out daily mileage reports. This is a win/win situation. They are happy to do less writing; and we are happy to experience a reduction in payroll hours.

I could go on and on and on singing the praises of EROAD. However my singing is not very good. But, the praises are higher than you could imagine. And there is no bigger fan of EROAD and what it has done to transform our day to day business.
